 Delivery **Tue 20. Oct - Wed 21. Oct 2026**

6 PCE in stock

Korda N-Trap Semi Stiff

In the past, Korda has been working on the further development of the N-Trap leader material series. After the successful introduction of the N-Trap Soft, now comes the N-TRAP SEMI STIFF!

Product information

This revolutionary semi-rigid leader material is particularly abrasion-resistant, yet supple enough and sinks very quickly to the bottom of the water. The inconspicuous and matt camouflage color provides a real camouflage effect. Like the N-Trap Soft, the braided core is made from a new and very special material and is therefore incredibly strong. With N-Trap Semi Stiff you can tie a variety of leaders in no time at all. Including, of course, the ever-popular combination rigs. The coating can be removed with the Korda Strippa Tool, but also with your fingernails. We also recommend treating the N-Trap Semi Stiff leader material before knotting and for stretching over hot steam!

A 30lb version has also been developed especially for the European market!

Further properties and specifications:

- Suitable for a variety of different leader types
- High abrasion resistance
- Fast sinking
- High tensile strength
- Herb green color
- Available in the strengths 15lb (6.8 kg), 20lb (9.1 kg) and 30lb (13.6 kg)

The N-Trap Semi Stiff will soon also be available in gravel/gravel brown and a silt/mud-colored version!

Attention: N-Trap SOFT and N-Trap SEMI STIFF are not suitable for crimping!
