More than 10 Stk. in stock

Flavor: fishy

Product information

NEW! V4.0 - the mix has been completely revised and enriched with natural stimulators (activated).

Even higher quality and more intense ingredients. Perfect value for money!

This dark, refined boilie really packs a punch. It is dominated by a delicate fish and squid scent. The mix contains a dash of blood and liver. That's why this is a real carp magnet!

In the current version (V4), we have increased the fish meal and liver content and added a little "feed sweetener." One of our long-standing favorites, which you can use very successfully all year round.

The "Pro Range" is our more affordable bait line and offers perfect value for money.

These are really good boilies with a perfect surface structure that have proven to be above average in terms of catchability. The baits are also optimally utilized by carp.

The Pro Range is an ideal solution for anglers who need more bait, while also being easy on the wallet.

The composition of the high-quality raw materials has been chosen so that the bait is quickly digested and excreted by the fish. In addition, these boilies are highly attractive and effective. They are also ideal for long-term strategies or larger feeding sessions.

Goes well with:
