More than 10 PCE in stock

Hemp Seed Mix

- The unique cooking process preserves all the water-soluble attractors and essential oils that make hemp so successful as an attractant feed. Frenzied Hemp is the ideal food to keep carp and large cyprinids busy and feeding for a long time without saturating them.

Tiger Nuts standard & XXL

- Tigers are one of the best baits around and need little explanation. With the cooking process, we have ensured that ready-to-use Tiger Nuts are always at hand and that the nuts are cooked in their own juice. As a result, all the lure-intensive ingredients remain intact and catchy!

Particle mix

- The unique preparation process preserves all the water-soluble attractors and the unique taste of this particle mix.
- Barley, hemp, tigernuts, corn

Super Seed Mix

Product information

- The unique preparation process preserves all the water-soluble attractors and the unique taste of this particle mix.
