from 6,99 EUR / PCE

incl. 20% VAT plus Shipping

Delivery **Fri 06. Nov - Mon 09. Nov 2026**

3 PCE in stock

Mainline presents the new Wafter Hookbaits, which have been specially developed to give your bait presentation a significant advantage - and it's very straightforward. All you have to do is pull the wafter onto the hair and the hook weight ensures that the hookbait slowly sinks to the bottom, achieving an optimally balanced ("critically balanced") position.

After extensive testing, we have succeeded in combining our special wafter recipe perfectly with the popular base mix of our Freezer Baits. For the contemporary carp angler, this means they can use balanced baits that are always ready to respond effectively to any carp take. The result? More reliable hook-ups and more carp in the net!

Recommended wafter to hook ratio:

- 12mm for size 8 hooks
- 15mm for size 6 hooks
- 18mm for size 4 hooks.
