Product information

Length in feet (ft):	13 ft
Test curve (lb):	3.50 lb

With all Watercraft rods we offer you a "tool" in perfection.
Each version has been extensively tested and ideally matched to the intended area of use.
It was also our aim to design this series with its own style. The angular ends of the Japanese EVA give the rods their own look. This should polarize.

The PR 13ft 3.50lbs S.U. is an incredibly fast and stable long-casting rod.

We have deliberately designed this model with thicker handle sections so that the angler has a really firm grip and can cast his rig "over the horizon". In addition, the distance from the reel seat to the end of the handle is slightly greater than with standard rods.
This model is recommended for competition anglers and ambitious anglers who want or need to fish long distances.

Recommended casting weight: 100 to 140g
Range of use: for casting on all waters - suitable for "long range fishing"

Quality comes 1st:
handmade in Austria
Free Spirit blank
ALPS components
uncompromising quality
each rod is provided with a serial number
new construction variants for long casting and spod rods
larger handle spacing for long casting and spod rods
body variants have been extensively tested

Dear customers: If rods are not in stock, you can order them from us. Your models will be built to order. Please ask us about availability and delivery times.
