Art.Nr.: 33953 / manufacturer: Korda

from 9,79 EUR / PCE

incl. 20% VAT plus Shipping

Delivery **Thu 05. Nov - Fri 06. Nov 2026**

3 PCE in stock

The Long Chuck Tapered Mainline is designed for distance casting in situations where you want to fish without a leader knot - particularly useful in weedy waters where weed could collect around the knot and cause problems under the rod tip.The Long Chuck Tapered Mainline is supplied on a 300m spool and has an 8m section of 0.47mm (30lb) diameter line at each end, which can take the force of the cast and also provides good abrasion resistance during the fight, and a 2m section that

Product information

tapers to the diameter of your chosen mainline.The line is identical at both ends, so if it breaks you can simply turn the line over on the spool and use it again.This tapered main line has the same properties as the Long Chuck main line. Extremely low stretch to compress the rod in the cast (heavy mono lines are usually very stretchy and hinder the cast), low water absorption, low weight for its carrying capacity as it is clear (dye increases the weight) and a perfect ratio of carrying capacity to diameter to reduce drag. It comes in strengths of 10-30 lb (0.27-0.47 mm), 12-30 lb (0.30-0.47 mm) and 15-30 lb (0.33-0.47 mm).
