1 PCE in stock

Product information

Length in feet (ft):	12 ft
Test curve (lb):	3.25 lb

With our hand-built Watercraft rods, we offer you a "tool" in perfection. Each version has been extensively tested and ideally matched to the intended area of use.

It was also our aim to create this series with a unique style. The angular ends of the Japanese EVA give the rods their own look. This should polarize.

This is the epitome of an all-round rod. Powerful and yet great in the fight. When fully loaded, it bends almost all the way into the hand section and offers a fully parabolic action. The casting performance is also outstanding.
Recommended casting weight: up to max. 100g
Range of use: can be used on all waters and/or for casting out with a boat.

- Quality comes 1st:
- Handmade in Austria
- Free Spirit Blank
- ALPS components
- uncompromising quality
- Each rod is provided with a serial number
- construction variants have been extensively tested

Dear customers: If rods are not in stock, you can order them from us. Your models will be built to order. Ask us about availability and delivery times.
