3 PCE in stock

TANZ RUBBER ROD GRIPS have been designed for maximum efficiency.
They are available in three sizes to suit most modern carp rod grip configurations and butt diameters.
Made from a strong nylon core material with a rubber coated surface, they provide just enough tension to hold the rod butt securely in place.

The robust nylon screw thread at the base is compatible with STANZ BANKSTICKS, BUZZ BARS and PODS.
The smallest size is suitable for handles with handles, the medium size is designed for shrink tube handles and the large size is ideal for classic cork handles.

- Minimalist design
- Rubber-coated for extra grip
- Three sizes for all bar types
- The nylon core ensures even relaxation tension

Available in 3 sizes:

- Small
