5 PCE in stock

Korda Stow MKII Indicator White

After a long wait, Korda has finally managed to launch the MK2 version of the Stow Bobbin and the matching snag bars. The new MK2 version now has an optimized body with a modified line clip.

Product information

Only after the patent rights to the original Elastow Bobbin principle were acquired from the inventor Carp Pashley did the Korda team set to work to further develop and fundamentally improve the popular bobbins. No expense was spared and the result was the Korda Stow Bobbin.

The striking advantage of this product is that with a normal hanger, the line slides through the line clip. With the Korda Bobbin Indicator, on the other hand, the main line is clamped so that even the finest plucks are clearly signaled.
The item is available in a total of 6 colors or as a complete set and can be expanded with many individual components.

Features:

Stow Indicator Head in 6 colors - Transparent in the middle for the use of Beta Lights (prohibited in Germany)
2 different chain lengths with 2 different colors
Optional additional weights
All threads are compatible with other common systems, for example from Matrix or Solar Tackle
Suitable for all bite indicators

Scope of delivery:

1 Stow Indicator Head
2 different chains (7.5 cm and 9 cm) in silver
1x Stix adapter
1x stix (field hockey stick)
