from 314,99 EUR / PCE

incl. 20% VAT incl. Shipping

 Delivery **Mon 19. Oct - Tue 20. Oct 2026**

1 PCE in stock

The Graphenon Spin impresses with its lightness, enormous power development, resilience in the fight and accurate long casts. An excellent "bait feel" and sensitive bite detection combined with a progressive action make these rods the perfect companion on the water. The ultra-light models, specially designed for use with very small and light lures, also have a super-sensitive tip, which meticulously indicates every bite and transfers it to the handle section.

The rod series is equipped with a FUJI-TVS reel seat, FUJI-KL/KT-SIC guides and robust, ergonomically designed Duplon handles. The Seatrout models are equipped with a full cork handle. The high-tech premium rod series that leaves nothing to be desired!
