As the "little sister" of the Beyond Spin series, the Revolt Spin series also features the pioneering 7-cornered Heptacore blank. Outstanding features such as maximum speed, optimum loading/acceleration, exceptional sensitivity and enormous power reserves naturally also apply to this series.

Conclusion: In terms of genes, these are the same rods as the Beyond Spin, just with different features. The Revolt Spin rods have SIC guides (K-style), a specially painted FUJI TVS reel seat, a removable FUJI hook eye and ergonomically designed Duplon handles.
