1 PCE in stock

Odyssey XXX is an incredibly successful big carp bait that combines low temperature fishmeal, milk proteins, yeasts, soluble fish protein, betaine and an incredible 10% GLM extract to produce "XXX" - a powerful natural bait that big carp simply can't resist.

# Product information

Features:

- Smooth, chemical-free, natural shellfish profile
- 10 % G.L.M. extract ensures high attractiveness under water
- Essential amino acids from high quality proteins
- The open texture promotes the release of nutrients and appetite stimulants
- Soluble attractors and proteins ensure year-round effectiveness
- Once carp know XXX, they just keep coming back for more

Our boilies contain no synthetic dyes, so different batches of the same bait may vary in color. This is due to natural color variations in some of the ingredients we use (such as fishmeal, spices, natural extracts, etc.) and has no effect on the quality of the boilie.
