Product information

Turn your Tempest Brolly 100 into a two-layer shelter with the Skull Cap Wrap, including a canopy that protects you from rain and sun. The second skin also prevents condensation inside. The Skull Cap Wrap completely covers the sides and the entire rear. It can be installed in seconds. It is simply attached around the brolly with pegs and fixed to the front of the tent with 3 poles. The rear windows match those of the brolly and allow air to circulate in warmer weather, keeping the tent cooler. The wrap has a rain gutter at the front and two rod holders with Velcro fasteners.
