More than 10 Stk. in stock

Flavor: fruity/sweet

Product information

Discover now our newly revised V4.0 boilie mix, enriched with natural stimulators that will take your catch to a whole new level. We have used even higher quality and more intense ingredients to offer the perfect value for money.

Our Super Sweet-Birdfood, creamy milk proteins and seeds, refined with a fantastic sweet forest fruit flavor, make this bait a real highlight. This creamy and easily digestible Milk-Birdy Boilie is a real carp magnet with a round, sweet taste that has been refined with a little N-Butyric.

Our bait is perfect all year round and is particularly eye-catching and tasty for the fish. It does not saturate them and encourages them to eat again and again. The "Pro Range" is our cheaper bait line and offers perfect value for money. The boilies have a perfect surface structure and are extremely catchy.

The high-quality raw materials are quickly digested and excreted by the fish so that you can catch more and more fish. Also ideal for long-term strategies or larger feeding sessions. Convince yourself of the effectiveness and attractiveness of our Pro Range boilies!

Goes well with this:

Watercraft Pro Range Smoke Pop Ups

Watercraft Pro Range Liquids
