10 PCE in stock

The Asso Tetramax is one of the absolute best lines on the market.
It is made from copolymer and with an additional fluorocarbon layer. This super soft, but also enormously robust line is on its way to becoming the best line in the carp fishing sector.

The extremely high breaking strain and knot strength make it possible to choose thinner diameters. This allows you to achieve a plus in casting distance without having to sacrifice safety during the fight.

Properties:
-high abrasion resistance
-very low elongation
-super strong
-fluorocarbon coating
-fast sinking
