3 PCE in stock

The easiest way to deliver feed balls over long distances.

For effortless and accurate feeding of food balls at extreme distances, the Ball Blaster is the ideal partner for the Ball Maker. The "Ball Blaster" sling lets feed balls fly further & faster with rod & reel at extreme distances than with catapults or spod rockets. Mounted on the main line and filled with a feed ball, distances of over 90 meters can be easily achieved even with soft rods - with remarkable accuracy.
