More than 10 PCE in stock

The ultimate protection against pesky crayfish, catfish and all other white fish that like to eat boilies. Claw Cracker provides an impregnable outer skin and the best protection for your boilies, wafters, pellets or pop-ups. Two strips are attached to the hookbait at a 90 degree angle to each other and shrunk using steam to achieve optimum protection. In combination with our Extender Stops, the hookbait can no longer slip off the hair and survives even stubborn attacks.

Available in two widths:

- Claw Cracker Medium 13-22mm baits
- Claw Cracker Large 23-32mm baits
