1 PCE in stock

The best and easiest solution for making PVA bags. The Speedload Bag can be slipped onto the Speedload System while the rig and feed are being filled into the bag. A special slot has been provided to allow the main line or leader to disappear inside. The "Twist&Seal" technique allows you to close the bag without using PVA tape, which speeds up the dissolving

Product information

process.

Simply put the PVA bag onto the Speedload, fill it, moisten it once with saliva and twist it. This way you can easily make PVA bags and you are ready for casting.

- Small: 55mm x 125mm (20 bags)
- Medium: 70mm x 155mm (20 bags)
- Large: 85mm x 180mm (20 bags)
