Delivery **Thu 05. Nov - Fri 06. Nov 2026**

2 PCE in stock

Special zig-hook kickers with an integrated bait screw to easily screw foam, plastic baits, cork balls and pop-ups onto them - without hair and without a needle.

Available in black, yellow, red and white. Zig Screws make it possible to change lures immediately, the optimum mechanism means that hooks turn in more quickly and they also help to camouflage the hook in the best possible way. Different colors bring additional attraction and faster bites, the slightly more muted colors are ideal on heavily fished waters, where fish already react negatively to bright colors. The "Mixed Colors" variant includes all color options. Four screws in one package plus color-coordinated foam lures.
