Delivery **Thu 05. Nov - Fri 06. Nov 2026**

4 PCE in stock

The quickest and easiest way of mounting so far. Bait Screws can be screwed into pop-ups, cork balls, boilies, plastic baits and nuts and hold them securely on the hair. They provide total freedom of movement for the bait and greatly improve hook penetration.

Threaded bait screws securely hold boilies, pop-ups, nuts and foam. Quick change of bait without a pin. Lighter than metal screws, the ideal choice for floating hookbaits, balanced baits and wafters. Available in 8mm and 21mm lengths.

10 pieces in one package.
