More than 10 PCE in stock

Product information

Diameter: 20 mm

Design/type: Hook-Baits

More is not possible! These baits contain all our know-how and only the best attractors and stimulants. They are coated with a soluble outer layer that has been enriched with fermented enzymes and dissolves in 1-5 hours, depending on the water temperature. This makes them much easier for carp to detect than normal boilies.

In combination with the core of our High Range boilies, these are the ultimate carp baits. **Perfect if only the best is good enough for you!**

These baits can increase your catch rate enormously all year round. To maximize the attraction at the feeding spot, it is advisable to feed five to ten of these activated baits. Combined with a pop-up, a visual stimulus can also be added.

These highly attractive baits can also make the difference in competitions and cups.

Content: 400g - Enough to make the difference!
