More than 10 PCE in stock

Watercraft Sweet Yellow Pellets are highly visible and appetite-stimulating pellets that are particularly effective in waters with high levels of particles and corn. Thanks to their sweet Birdy Corn formula and the CSL they contain, they offer an intense flavor and provide a strong attractant for carp. In the water, they dissolve slowly, continuously releasing attractants

Product information

and forming a noticeable feed cloud that keeps the fish in the area for a long time.

Due to their structure, the pellets quickly absorb additional flavors, boosters, or soaks and release them evenly underwater. This further enhances their attractiveness and appeal. The Sweet Yellow Pellets are particularly effective when fishing with a Spomb or rocket and are ideal as an additive to boilies, particles, or stick mixes. They also reach their full potential when fishing with a zig rig, providing a constant supply of feeding stimuli.

Features:

- Eye-catching, sweet Birdy corn pellets with an intense flavor
- CSL content for strong feeding stimuli
- Slow dissolution with a lasting attractant effect
- Perfect for soaking with boosters and flavors
- Ideal for Spomb, rocket, and feeding campaigns
- Combines well with boilies, particles, and stick mixes
- Very well suited for use in zig-rig fishing

We recommend soaking these pellets with our liquids:

WATERCRAFT Big Boost Liquid Corn Steep Liquor 1 Liter

WATERCRAFT Big Boost Liquid Hemp Oil 1 Liter
