Art.Nr.: 44295 / manufacturer: Korda

from 9,79 EUR / PCE

incl. 20% VAT plus Shipping

Delivery **Thu 05. Nov - Fri 06. Nov 2026**

10 PCE in stock

Line type: Monofilament

Product information

Specially developed for long-distance fishing
Ultra-low stretch
Very low water absorption
Green mono line
High breaking strain in relation to diameter
300m spool with tapered leaders on both sides Specially developed for long-distance fishing
Ultra-low stretch
Very low water absorption
Green mono line
High breaking strain in relation to diameter
300m spool with tapered leaders on both sides The Long Chuck Tapered Mainline is designed for casting at distance in situations where you want to fish without a leader knot - particularly useful in weedy waters where weed can collect around the knot and cause problems under the rod tip.The Long Chuck Tapered Mainline is supplied on a 300m spool and has an 8m section at each end with a line diameter of 0.47mm (30lbs), which can take the force of the cast and also offers good abrasion resistance during the fight, and a 2m section that tapers to the diameter of your chosen mainline.The line is identical at both ends, so if it breaks you can simply turn it over on the spool and use it again.
It comes in strengths of 10-30lbs (0.27-0.47mm), 12-30lbs (0.30-0.47mm) and 15-30lbs (0.33-0.47mm).

- Specially developed for fishing at long distances
- Ultra-low stretch
- Very low water absorption
- Green mono line
- High breaking strain in relation to diameter
- 300m spool with tapered leaders on both sides
